

How Christmas trees are made: Video Zone - exercises

Do you put up Christmas trees in your home or town? It's traditional to put up Christmas trees in Britain but nowadays most people prefer artificial ones, not real ones. Watch this video to find out where they come from and how they're made!

Do the preparation task first. Then, watch the video and do the exercises. If you need help, you can read the transcript at any time.

1. Preparation: matching

Match the vocabulary with the correct definition and write a – f next to the number 1 – 6.

- | | | | |
|--------|-----------|----|--|
| 1..... | PVC | a. | a building where products are made with machines |
| 2..... | a branch | b. | a knife or a sharp edge |
| 3..... | a needle | c. | polyvinyl chloride, a kind of plastic |
| 4..... | a factory | d. | a thin, sharp leaf on a tree |
| 5..... | a blade | e. | an arm of a tree |
| 6..... | a trunk | f. | the main body of a tree |

2. Check your understanding: multiple choice

Circle the correct answers.

 - PVC and metal
 - wood and metal
- Why are the branches pulled through a small coil?
 - to stick the needles together
 - to separate the needles
 - to cut the branches down to size
- Why are the branches cut by hand?
 - because a machine would break the needles
 - because a machine would bend the needles
 - because a machine would flatten the needles

3. Check your understanding: ordering

Write a number (1-6) to put these sentences in order.

- | | |
|-------|---|
| | The branches are attached to the tree trunk and the Christmas tree is finished! |
| | The shredded PVC is twisted around a metal wire and the needles are separated. |
| | The branches are cut to size by hand. |
| | First of all, flat strips of PVC are stuck together. |
| | Then the PVC is shredded by a circular blade to make the needles. |
| | Any sharp edges on the branches are bent over. |

4. Check your grammar: gap fill – passives

Complete the gaps with the passive form of the verb in brackets.
