

Transcript for **Sustainable development goals**

The United Nations is an organisation with goals of peace and sustainable development around the world. Their mission is huge, but we're breaking it down in two minutes.

17 sustainable development goals

Let's get to 'em 'cause the more you know

In some corners of the world today

People are living on a dollar a day

Hey, that's not how it ought to be

So goal 1? Eliminate poverty

And goal 2, root out hunger across the globe

There's 800 million people hungry, if you want to know

Number 3 is health and well-being

And getting people the health care that they're needing

Learning and school are the heart of goal 4

Education opens up minds and doors

Goal number 5 is empower girls and women

So they can have the same rights that men are given

Number 6: people need water that's clean

Poor sanitation can spread disease

Carbon-free energy is goal number 7

And how to achieve it is a question that's pressing

But if we put our minds together

And work hard, we can find a solution, I'm guessing

[chorus]

17 sustainable development goals

To improve life all around the globe

Protecting human health and the environment

Whatever bed we make we're going to have to lie in it (x 2)

Now imagine that you work all day for no pay
Economic growth and decent work is goal 8
Goal number 9 is to foster innovation
In infrastructure and industrialisation
Goal number 10: inequality reduction
11 is sustainable city construction
12: well, that's sustainable consumption
So what we use matches up with production
Goal 13 calls for urgent action
To combat climate change 'cause we know it's happening
14: protect life under seas
15: protect life on land
Goal 16 is for peace and justice
All over the planet, they're in high demand
And the final goal, number 17
It's the critical factor, the heart of the machine
It's to strengthen the way we achieve these goals
Of sustainable development around the globe, yo
[chorus]
